Waldzell: Meeting of the brightest minds

Last year Andreas Salcher and Gundula Schatz began with a radical unconventional initiative: they brought together some of the brightest minds of the world at Melk Abbey.

After the national success, the Waldzell Meeting has become an institution this year.

The seminar participants Paolo Coelho, the most influential author of our time, Craig Venter, the decoder of the human genome, noble prize winner Christian de Duve, who researched the structure of the human cell, the conductor Franz Welser-Möst, the architect Thom Mayne, the rabbi Jonathan Wittenberg and quantum researcher Anton Zeilinger are searching for “Blueprints for a Future with Meaning.” 10./11. Sept. in Melk Abbey
